

# Upstat

Application de monitoring de vos services très simple d'utilisation.

<https://belginux.com/installer-upstat-avec-docker/>

The screenshot displays the Upstat web application interface. The top navigation bar includes the 'Upstat' logo and a user profile icon. A sidebar on the left contains navigation links for 'Monitors', 'Notifications', 'Status Pages', and 'Settings'. The main content area is titled 'Monitors' and provides an overview of all monitors. A search bar and a 'Create' button are located at the top right of the main area. Below these elements is a table listing five monitors with columns for Name, URL, Frequency, and Heartbeat Summary. A large green circular graphic is overlaid on the table.

Name	URL	Frequency	Heartbeat Summary
chadman	https://chadman.vercel.app/	60s	██████████
www	https://chaman.is-a.dev	60s	██████████
trekly	https://trekly.com	60s	██████████
zws	https://zws.com	60s	██████████
qwerty	https://asd.com	60s	██████████
