

# WatchYourPorts - Ports des applications

Envie de savoir quels sont les ports ouverts sur une VM ? Un serveur ? Le tout avec une interface ?

**WatchYourPorts** application très simple d'utilisation qui va faire un travail de scan sur tous vos ports afin de vous afficher le résultat des ports ouverts dans une interface épurée.

<https://belginux.com/installer-watchyourports-avec-docker/>

The screenshot shows the WatchYourPorts web interface. At the top, there is a green navigation bar with 'Home', 'Config', and 'History' links. Below the navigation bar, the server IP is displayed as 'Server1: 192.168.1.176'. There are input fields for '1' and '65535', and a 'Scan' button. Below these, there is a 'Stop' button and the text 'Scanning port 688'. The main content area features a table with the following columns: Name, Port, State, Watch, and Del. The table contains six rows of data, each representing a monitored port. A 'Save' button is located on the right side of the table.

Name	Port	State	Watch	Del
	446 new	●	⏻	⊗
	445 new	●	⏻	⊗
	443 new	●	⏻	⊗
	139 new	●	⏻	⊗
	111 new	●	⏻	⊗
	80 new	●	⏻	⊗
	22 new	●	⏻	⊗
