

LongChat, le nouveau logiciel de tchat amateur par TA2STO

<https://j28ro.blogspot.com/2024/11/longchat-le-nouveau-logiciel-de-tchat.html>

The image shows the LongChat software interface. At the top, there is a logo consisting of a laptop and a radio connected by a double-headed arrow, with the text "QRP/long distance chat software ...". Below this is the "LongChat" logo in a stylized green font, followed by the subtitle "Ham Radio Text Chat Software by TA2STO". The main window displays a chat area with the text "CQ CQ TA2STO" and a large digital display showing "7,150,000 Hz". Below the display, there are technical specifications: "PacketLSB 3000Hz 0.0W SN 47 dB" and "THR 0.42". At the bottom of the window, there is a "Hello Date" input field, a "Send" button, a "CQ" button, and a "Disconnect" button. Below the window, there is a section titled "Chirp based encoding for SSB:" with a copyright notice "©2024 TA2STO" and a list of features: "Forward error correction codes", "40 bits /second net data", "BW (300-2700 Hz)", "Eb/No: 5 dB", and "SNR: -13 dB".
